# Projected Lifetime Earnings by Major 

By Douglas A. Webber

December 1st, 2019

The estimates in the following table are based on the 2014-2018 American Community Surveys and the baseline lifetime earnings model in Webber (2014) and Webber (2016). The estimates only apply to wage and salary earnings, and do not include other forms of compensation. Individuals who report that they are out of the labor force are excluded from the sample. All numbers are presented in constant 2016 dollars. The figures in this table are based on all individuals with at least a college degree, and therefore include some students who hold advanced degrees (Master's, PhD, JD, MD, etc.). All majors for which there was sufficient sample size across age groups to reliably estimate conditional means and variances were included.
